### **DETAILED ACTION**

1. The examiner of the application has changed. This case has now been transferred as of July 10, 2002. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Christopher Yaen, Group Art Unit 1642.
2. Amendment filed April 23, 2002 (paper no. 15) is acknowledged and entered. Claim 57 has been canceled without prejudice. Claims 51-94 are pending. Upon further review, the prior office action is vacated. A new restriction requirement is set forth.

### ***Election/Restrictions***

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 51-56, 58-60, 71-78, and 84-90, drawn to a method of inhibiting a humoral response in an animal comprising the administration of a soluble lymphotoxin-beta receptor, classified in class 514, subclass 2.
  - II. Claims 61-70, 79-83, and 91-94, drawn to a method of inhibiting a humoral response in an animal comprising the administration of an antibody against lymphotoxin-beta receptor, classified in class 424, subclass 130.1.
4. The methods of Group I and Group II utilize different products and have distinct method steps.

Art Unit: 1642

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
